درباره شرکت Ari-Armaturen

شرکت Ari Armaturen یک برند برجسته آلمانی با بیش از چند دهه سابقه در تولید شیرآلات صنعتی و راهکارهای کنترل جریان سیالات است که به‌خاطر کیفیت ساخت، مهندسی دقیق و انعطاف پذیری محصولاتش در صنایع سنگین جهانی شناخته می‌شود. این شرکت طیف گسترده‌ای از شیرهای کنترلی، ایزولاسیون، شیرهای ایمنی، تله‌های بخار و سیستم‌های صنعتی را برای کاربردهای مایع و گازی ارائه می‌دهد که در فرایندهای پیچیده صنعتی مانند نفت و گاز، پتروشیمی، نیروگاه‌ها، بخار و صنایع شیمیایی بهره‌برداری می‌شود. طراحی مادولار، انطباق با استانداردهای بین‌المللی و قابلیت تولید بیش از 20,000 محصول با هزاران پیکربندی، ARI را به انتخابی مطمئن برای مهندسان و طراحان سیستم تبدیل کرده است. علاوه بر کیفیت مکانیکی، ARI با راهکارهای دیجیتال مثل my-@Valve و ARI-ID، انتخاب، اندازه‌گیری و مدیریت شیرآلات را ساده و هوشمند می‌کند؛ این یعنی راه‌حلهایی که به صنایع کمک می‌کند کارایی، ایمنی و بهره‌وری انرژی خود را تسریع و بهینه کنند.

مرجع تجهیزات انرژی، تأسیسات و اتوماسیون صنایع

انرژی تجهیز ملل، فروشگاه تخصصی تأمین تجهیزات انرژی، تأسیسات و احتراق است. از مشعل و کنترلر تا شیرآلات کنترلی و سیستم‌های هوشمند موتورخانه، هر آنچه برای راه‌اندازی، نگهداری و بهینه‌سازی سیستم‌های انرژی نیاز دارید، در یک مجموعه مهندسی شده در دسترس شماست.

Fig. 046

For ANSI versions
refer to data sheet
„ARI-FABA®-Plus/-Supra ANSI“

Features:

- Double wall bellows seal as standard
- Plug with marginal seat
- Stem with fine thread
- Flat lubricating nipple
- Locking device, countersunk
- Cast iron variations with nodular iron bonnet as standard
- Heat dissipating bonnet
- Bonnet optimised for accessories
- Secondary sealing: gland packing
- Position indicator as standard
- Non-rising handwheel
- Non-rotation lock for each nominal diameter
- External stem thread
- Stem with roll hardened thread

Stop valve - straight through with flanges and bellows seal (Grey cast iron, SG iron, Cast steel)

Øs	(mm)	--	--	--	--	--	--	2,9	3,2	3,6	4	4,5	6,3	--	--	--	--

The material used for ARI valves with shoed ends (DN 65-200) P235GH according to DIN EN 10216-2.

Based on our experience we recommend electric welding process for connecting valves or strainers with tubes or with each other

Lime based electrodes with an appropriate composite material should be used as filler material for welding.

Gas welding should be avoided.

Due to the different material composition and material thickness of valves and tubes, gas welding is more susceptible to produce faults than electric welding (hardness cracks, coarse-grained structure).

Isolation plug with marginal seat;
stellited seat and plug ¹⁾

Plug with Soft seal
Max. operating temperature 200°C
at PTFE + 25% carbon

Screw down non-return plug with re-setting spring
(Set pressure refer to annex: Flow diagram)

Regulating plug with marginal seat ¹⁾

Regulating plug with soft seal ¹⁾
Max. operating temperature 200°C
at PTFE + 25% carbon

Screw down non-return regulating plug
with marginal seat ¹⁾
(Set pressure refer to annex: Flow diagram)

¹⁾ for max. permissible ΔP in throttling function, refer to annex: Flow diagram

Balancing plug
(Standard: DN15 - 300 with marginal seat, from DN350 with flat seat)

Valves with balancing plugs have to be installed with medium flowing over the plug (3) as indicated by flow direction arrow on valve body.

Working principles:

When the valve is closed, anticlockwise rotation of the hand wheel lifts the pilot plug (3.1) off the larger balancing plug (3).

This allows the medium to pass through the plug and equalizes the pressure of the medium under the plug (3). After the pressures have been equalized within the valves stated in the table, the valve can be opened by turning the valve further with normal manual force.

Balancing plugs are fully effective only in closed systems.

The pressures of the medium on either side of the plug can not be equalized if the medium is discharged into open air.

A bypass line or some other arrangement is necessary if too much time is required for pressure equalization owing to the volume in the piping system.

ARI-stop valves with differential pressures exceeding the following pressures, have to be fitted with pressure balancing plugs

¹⁾ Studs and nuts made of A4-70 (at temperatures below -10°C)

Please indicate when ordering

- Figure-No.
- Nominal pressure
- Nominal diameter
- Special design / accessories

Example:

Figure 35.046; nominal pressure PN40; nominal diameter DN100.
